Congratulations on your purchase of FixStream's Meridian. Meridian provides a comprehensive fault and performance management platform that allows you to collect and view availability and both real time and historical statistics directly from your web browser. While monitoring, collecting, and analysing data from routers, switches, firewalls, servers, and any other SNMP-enabled devices, Meridian successfully offers a simple-to-use, Flow2Path analytics and visualization platform for business focused IT operational analytics.

Version History

VERSION	RELEASE DATE
3.10.x	11 Nov 2016
3.6	16 Sep 2016
3.2	9 Sep 2016

Why Install this Version

In keeping with *FixStreams' commitment to provide a deep awareness of the location, health and performance of each specific application and its associated infrastructure resources inside and across cloud data centers, this version of Meridian introduces a number of significant enhancements to improve performance and provide greater stability in more demanding environments.

New Features and Enhancements

The following sections provide an overview of features and enhancements that are available in this version of Meridian.

[New Features of This Version](#)

Meridian version 3.10.x provides the following new features:

1. MERIDIAN-6565: Two way Integration with OTRS for auto ticketing
